Sep 2024 – Nov 2024

Remote

- Built and evaluated Python-based machine learning and NLP classification models using structured datasets.
- Handled the entire pipeline including data preprocessing, feature extraction with NLTK/TF-IDF, and final model evaluation.

PROJECTS

Image Classification on CIFAR-10 | *TensorFlow, Python*

Aug 2025 - Mar 2026

- Implemented a convolutional neural network (CNN) for multi-class image classification on the CIFAR-10 benchmark dataset.
- Utilized data augmentation and regularization techniques to improve model generalization during training.

Spam/Ham Email Classifier | *Python, NLTK, Scikit-learn, TF-IDF*

Sep 2024 - Nov 2024

- Built a binary text classification model using tokenization, stop-word removal, and TF-IDF vectorization to identify spam.
- Evaluated classifier performance and accuracy using detailed confusion matrix metrics.

Real-Time Object Detection | *YOLOv8, OpenCV, Python*

Aug 2023 - June 2024
